INTRODUCTION

Adult Farm Business Management Education programs have been part of the public school vocational agriculture offerings since 1952. From the early cooperative efforts of the State Department of Education, Department of Agricultural Education (U of Minn) and the Department of Agricultural Economics (U of Minn), the program has expanded to serve over 7000 farm families in six regional farm management areas. Programs are now cooperatively managed by the State Department of Education, the Division of Agricultural Education (U of Minn) AVTIs and local school districts.

From the very beginning the purpose of the farm management education part of the adult agriculture program was to help farm families achieve their farm business and family goals through improved management, organization and efficiency of their farms. The purpose has not changed.

To accomplish the purpose, programs have been organized to generally conform to the following guidelines:

1. Farmers enroll in a specific farm management course.
2. Each course has a specific major objective and specific units of instruction to meet the objective.
3. Courses are offered in sequence, and farmers are expected to enroll in the first course and follow the sequence. They may continue enrollment in the advanced courses as long as they desire.
4. There is continuity between the courses: each one leads to the other.
5. Part of the instruction is done on the farm with the individual farm family.

Most programs organize their courses around the same central themes. They are:

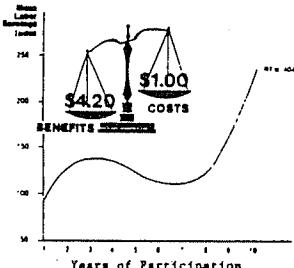

Year 1 - Farm Business records and accounts.

Year 2 - Farm business analysis and evaluations.

Year 3 - Farm business organization.

Advanced (for students who have completed years 1, 2 and 3). In the advanced series of classes and on-farm instructional visits the major emphasis is on evaluating the business, examining alternatives and continuing the reorganization of the resources used in the business.

Like most education programs, enrollees benefit from the instruction in relation to how much effort they put into study. But there have been some research studies that show that on the average, enrollees get some exciting results. They are best illustrated by the figure below.

This simple graph shows that for every dollar farmers spent on their management education they received a return of \$4.20.

Of course, some farmers may have benefited more, and some less, depending upon how seriously they studied the results of their business analysis and the kind of decisions they made as a result of the study.

There are community benefits too. They are best illustrated by examining what happens to farm sales as enrollees participate. The evidence suggests that farm sales for farm management enrollees in a community increased nine fold for every dollar spent on management education. It's a good way to stimulate both the rural and urban economy.

The summary of farm records for the Jackson Area (Southwest Minnesota) shows the results of the farm businesses enrolled in management education programs for 1980. Study the results carefully so you can use this information to improve agriculture in your area and in your business.

*Table 1 on this page lists the categories of farm capital for the averages of 365 farms. Page 4 lists the same information for the 73 most profitable and 73 least profitable farm businesses. Table 1 includes the landlord's share of the investment for rented farms.

*Other measures of farm size listed in lines 1 through 8 are helpful in describing the farms included in this farm management report.

Size as measured by acres for individual farms varied from 80 to over 1,200 acres: however, the vast majority of the farms fell in the range of 400 to 640 acres.

Machinery, equipment, and building values reflect cost less depreciation. Land is valued at a conservative market value.

Market livestock, crops for sale or feed are valued at market price at time of inventory was taken. Purchased and raised breeding livestock is valued at time put into useful production and carry same value for their useful life.

Work units provide a measure of the work load as an indication of size. Some clue to the farm organization is indicated by the distribution of work between crops and livestock.

The number of workers listed on line 7 includes the operator(s) hired labor, and unpaid family labor as well as the labor portion of custom work hired.

The net worth statement presents a picture of the financial structure of the operator's share of the farm business at the beginning and end of the year. The gain or loss in net worth is a dollar measure of progress. This statement, accurately kept, over a period of years is one of the best measures of financial progress.

The supplementary information listed in table 5 is helpful in studying the financial structure of the farm. All figures presented are based on the operator's share of the farm business.

*The ratio of total farm expense to total farm receipts (line 28) is a way of expressing the so-called margin. It answers the question, "how many dollars does it cost me to take in \$100"?

**The ratio of assets to liabilities (line 29) indicates the degree of solvency at the beginning and end of the year. This ratio is often referred to as the "net capital ratio." It answers the question: "How many dollars of total assets do I have to cover each dollar of debt?"

Thermometer Chart

Using your figures from page 15, locate your standing with respect to the various measures of farm organization and management efficiency. The averages for the farms included in this summary are located between the dotted lines across the center of the chart. Most profitable farms are indicated by a solid line, while the least profitable are shown by a broken line.

MEASURES OF FARM ORGANIZATION AND MANAGEMENT EFFICIENCY

The following explanations and definitions are for use in interpreting Table 8 on page 15 and the thermometer chart on 13.

1. Return to Operator's Labor and Management - A measure of the relative financial returns for the operator's labor and management, taking into account all income and expense cash and non-cash, including a charge for the use of farm capital. This is based on the whole farm business and is found in Table 2 and Table 3.
2. Crop Yield Index - A measure of the crop yield level for all crops produced expressed as a percentage of the average.
3. Percent of Tillable Land in High Return Crops - A measure of crop selection based on a rating of individual crops. Crop ratings take into account such things as dollar return, effect on soil, TDN yield, labor required, etc. Ratings can be found on Table 9.
4. Gross Return Per Acre - An additional measure of crop selection based on total production times an average price for the crops.
5. Return Per \$100 Feed Fed to Productive Livestock - Measures the general level of efficiency for all livestock. It is expressed as a percentage of the average and combines the individual livestock indexes into one figure.
6. Livestock Units Per 100 Acres - A measure of livestock density or population. Unit values are assigned to the various classes of livestock.
7. Size of Business - Work Units - A measure of the total work load. A work unit represents the average accomplishment of a worker in one 10-hour day. Work Unit values are assigned to each class of livestock, each crop, and to other tasks utilizing farm labor. Explanation on page 23.
8. Work Units Per Worker - Measures labor efficiency. It is the total work units divided by the number of workers including the operator, hired labor, and family labor.
9. Power, Machinery, Equipment and Building Expense Per Work Unit - A measure of expense control. It is the total cost of items listed in Table 3 divided by the number of work units.
10. Farm Capital Investment Per Worker - Indicates size of business. Useful in comparing a farm business to other industries or businesses.

Other items listed on Table 8 are related to the above measures and serve to further define and describe the efficiency level of a farm business.

Note should be taken that items listed in Table 8 and the thermometer charts are to be considered in light of the individual farm and farm operator. Although in general, an above-average level for each factor listed would indicate as above average earnings, this may not be true when individual farms are considered. The inter-relationship of factors varies from farm to farm.

CROP TABLES - CROPS ANALYSIS

The Crop Analysis Table for each individual crop show the yield, value per unit, crop product return, other crop income and total crop return.

Costs such as fertilizer, chemicals, seed and other, hired labor and custom work are costs that can be assigned to each individual crop in the account book. These costs are shown in the Crop Tables under the heading "Direct Costs", line 8 thru 13.

"Allocated Costs", lines 17 thru 22, are a combination of cash and non-cash expenses and may be either calculated or assigned. A proportion of the total ownership and operation costs of power and machinery is calculated for each crop by using the work unit value for that crop. The farmer may modify this cost by assigning a specific power cost allocation factor (PCAF) for each crop. Land cost used is the fair rental value for land of similar type in the local area.

Some of the more difficult expenses to assign or distribute to various enterprises within the farm business are items such as electricity, telephone, general farm expense and interest. However, if one wishes to distribute these costs to the crop and livestock enterprises within the business, the spaces provided at the bottom of each individual crop printout provides for this.

COSTS AND RETURNS FROM LIVESTOCK ENTERPRISES

Productive livestock enterprises are an important part of the farm business in all but a few of the farms involved in this report. Table 11 through 17A pertain to the major livestock enterprises.

Since feed is the largest single item of cost for all classes of livestock, return above feed costs has been used to classify farms into high and low average groups.

Other cash cost items that are relatively easy to identify and classify in the record book are listed in each of the tables as other direct costs to the livestock enterprises. The return over feed and supplemental costs, therefore, is not a new return, but rather the amount available after paying for the feed and those cost items listed to cover outlay for the costs of buildings, machinery, equipment, labor, taxes, insurance, interest, and other fixed costs.

In calculating the total return for the enterprise, the inventory change, purchase and sale of livestock, value of animals butchered, products sold, and products used in the home are considered in order to arrive at the total income or total return for the enterprise. The total return is divided by the net quantity produced or number of head to arrive at a per unit figure for comparison.

Feed costs are determined from feed records kept by the farm operator. Purchase price is used for all feed purchased from off the farm. An average price is charged for each kind of farm grown feed. Farm grown feed prices are listed below.

The items listed as Supplementary Management Information provide further clues to the reasons for high, low, or average livestock returns.

All livestock costs and returns are computed on an animal basis. Thus, with feeder enterprises, inventories of feeder animals are involved. In most cases, the amount indicated as "price per cwt. bought" is the cost of those animals on hand at the end of the year; likewise, the amount given as "price per cwt. sold" is the price received for animals sold during the twelve months period, most of which were animals on hand at the beginning of the year.

EXPLANATION OF WORK UNITS AND ANIMAL UNITS

The total "work units" for any one farm is a measure of the size of that farm business. A work unit as used in this report is the average accomplishment of a farm worker, in a ten hour day, working on crops and productive livestock at an average efficiency. The number of work units for each class of livestock and each acre of crop are presented below.

UNITS FOR EACH CLASS OF LIVESTOCK & EACH ACRE OF CROP

Item	No. of Work Units	Item	No. of work Units/acre
Dairy Cows	7.0/cow	Barley, Wheat, Oats, Rye	.30/acre
Other Dairy Cattle	1.2 head*	Flax	.30/acre

SETTING GOALS

One of the primary aims of the farm management education program is to assist farmers in reaching their farm and family goals. Clarifying their ideas as to what they really want is a very important step in improving the farm business and as a result improve family living.

Sitting down as an operator or husband and wife and putting these wants in writing is done in one of the early classes in the adult farm management education program.

Planning goals is not easy. All members of a family may not agree on what goals are most important. The family may have to give serious thought and discussion to the goals they choose so that all members of the family can benefit from the farming business. Not all goals are related to farm income. Some very important goals for a family may be in the area of social, community, family, church and educational activities.

Setting up goals in a systematic way lets the family fit the wants and desires of all the family members into a plan. There are no right or wrong goals, since each family may approach the problems and opportunities they have in a different way. It is important that goals be reviewed frequently to see if conditions have changed. If the goals are too inflexible, they may be a liability to progress rather than an asset.

On the bottom of this page is a place for you and your family to write your goals for the coming year. The following year, these goals will be reviewed, evaluated and probably changed or expanded to fit the ever changing needs and desires of the family.

WHAT DOES YOUR FAMILY WANT?

NAME _____ DATE _____

ADDRESS _____

One of the steps for improving the farm and home business is to clarify what is wanted. You may know of things you have wanted as a family, but it takes considerable thought and discussion among family members to agree upon what is most important and which things come first. As a family, write down your goals for this year and for the future, then number them in order of priority.
