### INTRODUCTION

Adult Farm Business Management Education programs have been part of the public school vocational agriculture offerings since 1952. From the early cooperative efforts of the State Department of Education, and the Department of Agriculture Education (University of Minnesota), the program has expanded to serve over 4500 farm familes each year in six regional farm management areas. Programs are managed by the State Board of Vocational Technical Education through AVTI'S and local school districts.

From the very beginning the purpose of the farm management education part of the program was to help farm families achieve their farm business and family goals. This was done through improved management organization and efficiency of their farm operations. This purpose has not changed over the years.

To accomplish this purpose, programs have been organized to generally conform to the following guidelines:

- 1. Farm familes enroll in a specific farm management course
- Each course has a specific objective and units of instruction to meet the objective.
- Courses are offered in sequence, and farmers are expected to enroll in the first course and follow the sequence.
- 4. There is continuity to each course. Each one leads to another.
- 5. Part of the instruction is done on the farm with the individual farm family.

Most programs organize their course around the same central themes. They are;

Year 1 - Farm business records and accounts.

Year 2 - Farm business analysis and evaluation.

Year 3 - Farm business organization.

Year 4 - Farm reorganization and enterprise efficiency.

Like most education programs, enrollees benefit from the instruction in relation to how much effort they put into study. There has been some research studies that show some exciting, postive, results for some members of Farm Business Management Classes. Some farmers have benefitted more, some less, depending upon how seriously they studied the results of their business analysis and the kind of decisions they made as a result of their study.

The summary of farm records for Central Minnesota (Willmar Center) area shows the results of the farm businesses enrolled in management education programs for 1985. Study the results carefully so you can use this information to improve agriculture in your area and in your farm business.

The analysis of the records and preparation of this report is done under the direction of John Thell, Area Agriculture Program Coordinator, at the Willmar Area Vocational Technical Institute. Directing in a supervisory capacity is Ronald Erpelding, AVTI Director, Lowell Melbye, Sup't. of schools, State Board for Vocational-Technical Education, and Dr. Edgar Persons, Head, Agriculture Education Division, University of Minnesota. Clerical work was done by Joyce Jacobson and Celeste Thell. Data processing was done by Specialized Data System, Inc., Madison, Wisconsin.

Below is a listing of the schools involved and the instructors responsible for these programs.

MACHINERY, EQUIPMENT, AND BUILDINGS REFLECT COST LESS DEPRECIATION. LAND IS VALUED AT A CONSERVATIVE MARKET VALUE.

MARKET LIVESTOCK, CROPS FOR SALE OR FEED ARE VALUED AT MARKET PRICE AT TIME THE INVENTORY WAS TAKEN. PURCHASED AND RAISED BREEDING STOCK IS VALUED AT TIME PUT INTO USEFUL PRODUCTION AND CARRY THAT SAME VALUE FOR THEIR USEFUL LIFE.

WORK UNITS PROVIDE A MEASURE OF WORK LOAD AND SIZE OF BUSINESS.

HOUSEHOLD AND PERSONAL ACCOUNTS ARE IMPORTANT IF THE FAMILY IS TO MANAGE ITS FINANCIAL AFFAIRS WISELY. THE HOUSEHOLD AND PERSONAL EXPENSES REPRESENTED IN THIS TABLE ARE FROM THOSE WHERE A COMPLETE HOUSEHOLD RECORD WAS KEPT IN THEIR FARM RECORD BOOK.

# EXPLANATION OF RATIOS IN TABLE 5 FINANCIAL POSITION OF OPERATOR

- LINE 28 RATIO- TOTAL FARM EXPENSE TO TOTAL FARM RECEIPTS.

  Sometimes called the gross ratio, expresses the percentage of each dollars worth of income consumed by expenses. It's calculated by dividing line 46, Table 6B by line 40, Table 6A.
- LINE 29 RATIO- TOTAL ASSETS TO TOTAL LIABILITIES. Sometimes called Net Capital Ratio, measures the degree of financial safety in the farm business. It shows the number of dollars in assets available to cover each dollar of debt.
- LINE 30 RATIO- NON-REAL ESTATE ASSETS TO NON-REAL ESTATE DEBT.

  Sometimes called the Intermediate Ratio, is calculated by dividing the sum of lines 1,2,3,& 7 by Non-Real Estate liabilities, lines 11, 12 & 13.
- LINE 31 RATION- REAL ESTATE ASSETS TO REAL ESTATE DEBT.

  This is calculated by dividing the sum of lines
  4,5,& 8 by line 10. Lending agencies are often
  interested in the relationship of line 30 to line 31.
- LINE 32 RATIO- NET WORTH TO TOTAL LIABILITIES.

  This ratio shows the owners equity to total debt.

  It expresses the percentage of liabilities to that covered by net worth.
- LINE 33 RATIO- CASH OPER. EXPENSE TO ADJ. TOTAL FARM SALES.

  This is calculated by dividing line 35 in Table 6B by line 41, Table 6A. It differs from Line 28 in that it does not include the sale or purchase of Capital Assets.
- LINE 34 RATIO- TOTAL FARM RECEIPTS TO AVE. FARM CAPITAL-WHOLE FARM. This is sometimes called the Capital Turnover Ratio. It is calculated by dividing line 40, Table 2A by Average Farm Capital in Table 1. It indicates to the farm operator the amount of gross income received for each dollars worth of capital used in the business.
- LINE 35 RATIO- TOTAL FARM RECEIPTS TO AVERAGE FARM CAPITAL,
  OPERATORS SHARE. This is the same as line 34 except
  its the operator's share only. It's calculated by
  dividing line 40, Table 6A by Average Farm Capital,
  Table 5.

### EXPLANATION OF WORK AND ANIMAL UNITS

THE TOTAL WORK UNITS ON ANY ONE FARM IS ONE MEASURE OF THE SIZE OF THAT PARTICULAR FARM BUSINESS. BANKERS AND OTHER CREDITORS ARE INTERESTED IN WORK UNITS AS A SIZE OF THE BUSINESS. THIS CAN BE A MEASURE OF ABILITY TO PAY OFF DEBT. A WORK UNIT, AS USED IN THIS REPORT, IS THE AVERAGE ACCOMPLISHMENT OF A FARM WORKER IN A TEN HOUR DAY. TOTAL NUMBER OF WORK UNITS IUS NOT A MEASURE OF HOW HARD A FARMER WORKS OR HOW MUCH MACHINERY AND EQUIPMENT IS USED IN GETTING THE FARM WORK DONE, BUT IT DOES MEASURE HOW MUCH IS BEING ACCOMPLISHED ON THE FARM. IT DOES MEASURE THE SIZE OF A FARM BUSINESS IN COMPARISON WITH OTHER FARMS.

## MEASURES OF FARM ORGANIZATION AND MANAGEMENT EFFICIENCY

The following explanation and definitions are for use in interpreting Table 8 and the Thermometer Chart on pages 16-17.

- 1. LABOR EARNINGS A measure of the relative financial return for the operator's labor, taking into account all income and expense (cash and non-cash) including a charge for the use of farm capital at a rate of 7%. This is based on the whole farm business and is also found on Tables 2 and 3.
- CROP YIELD INDEX A measure of the crop yield level for all crops produced expressed as a percentage of average. Average being rated as 100%.
- 3. % TILLABLE LAND IN HIGH RETURN CROPS. A measure of crop selection based on a rating of indivdual crops. Crop ratings take into account such things as dollar return, effect on soil, TDN., yield, labor required, etc. Ratings can be found on Table 9.
- 4. GROSS RETURN PER ACRE An additional measure of crop selection based on total production times an average price for the crops, plus other income.
- 5. RETURN PER \$ 100 FEED FED TO LIVESTOCK Measures the general level of efficiency for all livestock. It is expressed as a percentage of the average and combines individual livestock indexes into one figure.
- 6. LIVESTOCK UNITS PER 100 ACRES A measure of livestock density or population. Unit values assigned to the various classes of livestock. Unit values are found in Table 7, page 14.
- 7. SIZE OF BUSINESS-WORK UNITS A measure of the total work load. A unit represents average accomplishment of a worker in a ten hour day. It also may indicate the size of the total business. Units are assigned to each class of livestock, each crop, and to tasks using farm labor.
- 8. WORK UNITS PER WORKER Measures labor efficiency. It is the total work units divided by the number of workers on the farm including the operator, hired labor, and family labor.
- 9. POWER, MACHINERY, EQUIP., BLDG. EXPENSE PER WORK UNIT.
  A measure of expense control. It is the total of lines 24 through 29 in Table 3 divided by the number of work units.
- 10. FARM CAPITAL INVESTMENT PER WORKER Another measure indicating size of business. Useful in comparing a farm business to other industries or businesses.

Other items listed on Table 8 are related to the above measures and serve to further define and describe the efficiency level of the farm business. Note should be taken that items listed in Table 8 are to be considered in the light of the individual farm and farm operator.

# TABLE 10 - CROP ANALYSIS AND RANK EVALUATION EXPLANATION

The individual crop analysis table shows the yield, value per unit, and gross return per acre for each crop raised last year.

Costs such as fertilizer, chemicals, seed, and others, hired labor, and custom work hired are costs that are assigned to each individual crop in the account book or computer record keeping system. These costs are shown in table 10 under Direct Costs.

Other costs, called Allocated Costs, are not actual costs incurred but a calculated cost. The power and crop machinery expense is divided into ownership and operation costs for each crop. The power and crop machinery expense for crop work unit is calculated from the expense and net decrease on Table 3, page 7 of this report. Work units for each crop are used as a factor to calculate the per acre cost for power and crop machinery. Line 22 on each crop table shows the calculated interest on investment for equipment and land.

Land cost used in this report is considered the going rental value for land of similar type in the local area. Land rental value reflects a charge for taxes and interest investment in land. The only cost not included is storage cost and the operators labor.

The following crop ranks are used in this area preport for crops raised. This rank is used in measuring the crop selection under percent high return crops on Table 8, measures of farm organization. An "A" ranked crop is rated at 100, "B" crop at a value of 50, "C" crop at 25 and a "D" crop has a rating of "O".

A Ranked Crops	B Ranked Crops	C Ranked Crops	D Ranked Crops
Corn, grain Soybeans Edible beans Potatos Sunflowers Sugarbeets Alfalfa Other legumes	Flax Wheat Corn Silage Legume silage	Barley Rye Sorghum Sudax Sorg. silage Millet Oat silage	Oats Meadow (till) Summar fallow

## COSTS AND RETURNS FROM LIVESTOCK ENTERPRISES + EXPLANATION

Productive livestock enterprises are an important part of the farm business in most farms involved in this report. Tables 11 through 17 pertain to the major livestock enterprises.

Since feed is the largest single item of cost for all classes of livestock, return above feed costs has been used to classify farm livestock enterprises into high, low, and average groups.

Other cash item costs that are relatively easy to identify and classify in the record book, are listed in each of the tables as other direct costs to the livestock enterprises. The return over feed and supplemental costs therefore, is not a net return, but rather the amount of dollars available after paying for feed and cost items listed in each livestock table. This return can be used to cover outlay costs of buildings, machinery, equipment, labor, insurance, and other fixed costs.

In calculating the total return for the enterprise, the inventory change, purchase and sale of livestock, value of animals butchered, products sold, and products used in the home are considered in order to arrive as the total income or return for the enterprise. The total is divided by the net quantity produced, or the number of head, to arrive as a per-unit figure for comparison.

The items listed as, supplementary management information, provide further clues to the reasons for high, low, or average livestock enterprise returns.

All costs and returns for livestock enterprises are computed as return per head or hundred weight produced.

### PRICES USED IN THIS REPORT FOR HOME GROWN FEED FED LIVESTOCK

Grains-per bushel Corn, grain Oats	\$2.50 \$1.50	Other Roughages-per ton  Corn silage \$ 19.00  Legume silage \$ 19.00  Oatlage \$ 15.00  Stover stacks \$ 18.00

## SETTING FARM AND FAMILY GOALS

One of the primary aims of a farm business management education program is to assist farm families in reaching their farm and family goals. Clarifing their ideas as to what they really want is a very important step in improving the farm business and, as a result, improve family living.

Sitting down as family operators and putting down these wants in writing is done in one of the early classes in a farm business management course.

Planning obtainable goals isn't easy. All members of a family may not always agree on which goals are most important. Not all goals are related to the farm business. Some very important goals for a family may be in the area of social, community, church, and educational activities.

Setting up goals in a systematic way lets the family fit the wants and desires of all family members into a plan. There are no right or wrong goals. Remember goals must be set with some degree of flexibility to be an asset to the family.

Below is a suggested form for writing down the family goals fir this year and future years. After the family has writtn down their goals you can rank them in order of importance.

### GOALS FOR FARM AND FAMILY
