#### INTRODUCTION

Farm Business Management education programs have been a part of the Agriculture Education program in Minnesota schools since 1952. From the early cooperative efforts of the State Department of Education and the Department of Agriculture education (University of Minnesota), the program has expanded to serve over 6000 farm families each year in six farm management areas. Programs are now administered and managed by the Minnesota Technical College System through the Technical Colleges and local school districts.

The purpose of farm management education is to help farm families achieve their farm business and family goals. This is done through improved management organization and efficiency of their farm operations. This purpose has not changed over the years.

To accomplish these purposes, programs have been organized to conform to the following quidelines:

- 1. Farm families enroll in a specific management course.
- 2. Each course has a specific objective and units of instruction to meet the objective.
- 3. Courses are offered in sequence and farmers are expected to enroll in the first of the sequence of courses.
- 4. There is continuity to each course. Each leads to the next course in the sequence.
- 5. Instruction occurs both in the classroom and on the farm with the farm family.

Programs organize their course around the same central theme. They are:

- Year 1 Farm business records and accounts.
- Year 2 Farm business analysis and evaluation.
- Year 3 Farm business organization.
- Year 4 Farm reorganization and enterprise efficiency.
- Year 5 Current issues in farm management.
- Year 6 Managing the business for family goal attainment.

Like most educational programs, members benefit from the instruction in relation to how much effort they put into study. Some farmers have benefitted more, and some less, depending upon how seriously they studied the results of their business analysis and the kind of decisions they made as a result of their analysis.

Please note that the order of printing and format of printing for the analysis has been revised. We believe the new layout allows for easier access to the most requested farm business information

Please be reminded that, in this analysis, all specific and general farm expenses have been allocated to each farm enterprise. These items include: production expense, equipment expense, building expense, interest utilities, insurance, and general farm expense. The return over listed costs for each of the enterpoise may be used for family living, like repayment, capital purchases or vavings. We believe fide to be lossed for long responsibles a more accounts report to be used for long responsibilities, short term cash purchase planning and tash flow projections.

The Apport and the individual cooperators' reports were completed under the allocation of DelRay Lecy, Area Ag Coordinator at the Staples Technical College. Directing in a supervisory capacity were: Mr. Jack Nelson, Superintendent of Light Coblic Schools; Dr. Stan Edin, Director of the Staples Technical College: Mr. John Murray, Adult Specialist, State Board of Vocational Technical Education; Dr. Edgar Persons, Head of the Agricultural Education Division, University of Minnesota. Clerical assistance was provided by Lorraine Anderson, Shirley Judd and Shelly Johnson. Data processing was done by Specialized Data Systems in Madison, Wisconsin.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

The Records used in completing this report came from farmers enrolled in the Farm Business Management programs in Northeast and East Central Minnesota.

Below is a list of the Schools involved and the Instructors responsible for these programs:

programs.	
Southern Polar Center (serving Barnum, & Moose Lake)	Darrel Ober
Bemidji TC (serving Bagley, Clearbrook, Gonvick, Bemidji, Blackduck, Kelliher and Northome)	Jim Sackett, Steve Ziegler
Duluth TC (serving St. Louis County)	Jim Takala
Foley	Ken Johnson
Freshwater Education District (serving Browerville, Clarissa, Eagle Bend, Bertha, Long Prairie, Pillager, Parkers Prairie, Staples, Motley, and Sebeka)	Bob Anderson Bill Ladwig Dallas Sams
Long Prairie	Robert Johnson
Midstate Education District (Little Falls)	Dave Stish
Milaca	Lee Todnem Brad Burkland
Park Rapids	Craig Paskvan
Pierz	Ben Jorgensen
Pine City Technical College	Roger Thompson Dave Trampe
Princeton	Wes Wankel
Staples Technical College Aitkin Elk River	Brad Irwin Terry Phillips
Upsala	Del Pepple

### MONEY SPENT BY THE AVERAGE NORTHEAST AND EAST CENTRAL MINNESOTA FARMER

#### SUMMARY BY YEARS

	1986	1987	1988	1989
TO OTHER FARMERS FOR LIVESTOCK & CUSTOM WORK	6755	7398	8636	8478
TO THE AGRI-BUSINESS COMMUNITY FOR FERTILIZER, CHEMICALS, FEED, SEEDS, REPAIRS, FUEL & SUPP.	43732	48090	56364	61560

THE OPERATOR'S FINANCIAL STATEMENT PRESENTS A PICTURE OF THE FINANCIAL STRUCTURE OF THE FARM BUSINESS AT THE BEGINNING AND END OF THE YEAR. THE CHANGE IN EQUITY, SHOWN ON TABLE 5.2 - LINE 24, IS A DOLLAR MEASURE OF PROGRESS. THIS STATEMENT, WHEN ACCURATELY KEPT OVER A PERIOD OF YEARS, IS ONE OF THE BEST MEASURES OF FINANCIAL PROGRESS. THE SUPPLEMENTARY INFORMATION SHOWN ON TABLE 5.2 IS HELPFUL IN STUDYING THE FINANCIAL STRUCTURE OF THE FARM. ALL ASSETS ARE BASED ON THE MODIFIED COST (COST MINUS DEPRECIATION). LAND MAY HAVE BEEN ADJUSTED TO REFLECT LONG TERM CHANGES IN VALUE.

#### EXPLANATION OF TABLE 5.2 RATIO'S

- 32 THE CURRENT RATIO This is a measure of liquidity. It indicates the shortrun ability of the business to service debt. It demonstrates the adequacy of current assets, if liquidated, to pay off annual debts as they come due. Usually current assets have a life of 1 year or less. It is calculated by dividing current assets by current liabilities.
- 33 <u>INTERMEDIATE RATIO</u> Intermediate assets and liabilities are those where the finances used are converted into product in a period usually from one to ten years. Examples may be breeding livestock, machinery and equipment. The increase in the ratio over a period of time is a favorable sign. It is calculated by dividing intermediate assets by intermediate liabilities.
- 34 <u>WORKING RATIO</u> The desired trend is for this ratio to increase over time. It is also desirable for this ratio to be larger than the fixed ratio and net capital ratio. The farm business needs to have sufficient liquid assets and retain management flexibility to absorb price decreases and other factors negatively affecting current and intermediate asset values. This ratio is calculated by dividing current assets and intermediate assets by current liabilities and intermediate liabilities.
- 35 <u>FIXED RATIO</u> This ratio should be in excess of one but it is also important for this ratio to be increasing over time. This ratio should not be increased at the expense of a safe working ratio. It is calculated by dividing long term assets by long term liabilities.
- 36 NET CAPITAL RATIO Net capital ratio is one of three measures of solvency; how much value remains if all assets are converted to cash at inventoried value and the total debt is paid. This ratio reflects the risk-bearing capacity of the farm business by showing the percentage that assets could decline and still cover liabilities. The higher the ratio number, the better the risk. A ratio of less than 1.0 = insolvent, a ratio of 1.0 = a net worth of zero. A ratio of 2.0 is considered a safe ratio. This would allow a 50% reduction in asset value or 100% increase in liabilities before becoming insolvent. This ratio is calculated by dividing total assets by total liabilities.
- 37 <u>EQUITY/ASSET</u> This ratio shows the portion of total assets paid for and owned by the operator clear of financial claims. A ratio of .80 shows that the operator owns 80% of all total assets and a ratio of .44 shows he owns only 44% of all total assets. Therefore, this ratio should be <u>increasing</u> over time. It is calculated by dividing total equity by total assets.
- 38 <u>DEBT/EQUITY</u> This is another overall measure of solvency. It shows the relationship between debt and equity. A ratio of 1.00 indicates that equity and debt are equal. That would be equivalent to a net capital ratio of 2.00 to 1.00 and asset equity/asset ratio of .50 to 1.00. All measures of solvency use the same three measures of financial position. They all express relationships between assets, liabilities and net worth (or equity). Lenders prefer a debt/equity ratio of less than 1.0. It is calculated by dividing total liabilities by total equity.
- 39 <u>CURRENT DEBT</u> The lower the current debt structure ratio is, the more liquid the business. A ratio of .10 means only one dollar (\$1.00) out of every \$10 debt must be paid within the next year. A ratio of .50 means one half of the total debt must be paid in the next year. This ratio is calculated by dividing current liabilities by total liabilities.

#### MEASURES OF FARM ORGANIZATION AND MANAGEMENT EFFICIENCY

The following explanations and definitions are for use in interpreting Table 8 and the Thermometer Chart:

- 1. Return to Labor & Management. A measure of the relative financial return for the operator labor, taking into account all income and expense, cash and non-cash, including a charge for the use of farm capital. This is based on the whole farm business and is found also in Table 2 and Table 3.
- 2. <u>Crop Yield Index</u> A measure of the crop yield level for all crops produced, expressed as a percentage of the average; the average being 100%.
- 3. <u>Return over all Listed Cost Per Tillable Acre</u> (Excluding pasture) This is the net return per tillable crop acre after all variable and allocated costs have been paid.
- 4. <u>Gross Return per Acre</u> An additional measure of crop selection, based on total production times an average price for the crops, plus other crop income.
- 5. Return per \$100 Feed Fed to Productive Livestock Measures the general level of efficiency for all livestock. It is expressed as a percentage of the average and combines the individual livestock indexes into one figure.
- 6. <u>Livestock Units per 100 Acres</u> A measure of livestock density or population. Unit values are assigned to the various classes of livestock.
- 7. <u>Size of Business Work Units</u> A measure of the total work load. A Work Unit represents the average accomplishment of a worker in one 10 hour day. Work Unit values are assigned to each class of livestock, each crop, and other tasks utilizing farm labor.
- 8. <u>Work Units per Worker</u> Measures labor efficiency. It is the total work units divided by the number of workers on the farm; including the operator, hired labor, and family labor.
- 9. <u>Power, Machinery, Equipment and Building Expense per Work Unit</u> A measure of expense control. It is the total of items 31 through 36 in Table 3, divided by the number of Work Units.

Other items listed on Table 8 are related to the above measures and serve to further define and describe the efficiency level of the farm business. Note should be taken that items listed in Table 8 and the Thermometer Chart are to be considered in the light of the individual farm and farm operator. Although, in general, an above average level for each factor listed would indicate above average earnings, this may not be true when individual farms are considered. The inter-relationship of factors varies from farm to farm.

#### TABLE 10 - INDIVIDUAL CROP ENTERPRISE ANALYSIS

The individual crop analysis table shows acres, yield, value per unit, (usually the value per unit at harvest time), and gross return per acre for each crop raised by a particular farmer during the last crop year.

Costs such as fertilizer, chemicals, seed, crop drying expense, special hired labor, and custom work are costs that are assigned to each individual crop in the account book or computer record system. These costs are shown in table 10 under <u>variable costs</u>.

Other costs, called <u>allocated costs</u>, are calculated from the actual costs incurred. They are allocated by formula. The power and crop machinery expense is divided into ownership and operation costs for each crop. Allocated cost calculations are assigned to each production enterprise. Rented land cost is a reported cost from the farmer's records.

The total crop return minus the variable and allocated costs equals the return over listed costs, which is line 44.

All crop enterprises produced on a farm are listed separately. This allows the operator to compare the return over listed costs for each crop produced.

Land cost on on these tables is either the actual lease amount or the actual cost of ownership.

The total cost adjusted to 7% opportunity cost (L51) is the actual listed cost less assigned interest plus a 7% interest charge on the average inventory value of vehicles, machinery, irrigation equipment, and buildings.

## COSTS AND RETURNS FROM LIVESTOCK ENTERPRISES

Productive livestock enterprises are an important part of many farm businesses in Minnesota. Farms involved in this report may have one or more livestock enterprises. The following tables pertain to these livestock enterprises.

Since feed is the largest single item of cost for all classes of livestock, return over feed costs has been used to classify farm livestock enterprises into high, low and average groups.

Other cash costs relatively easy to identify and classify in the farm records are listed in each of the tables as other direct costs.

Allocated costs include interest charges to the enterprise, allocated charges for hired labor, utilities, power and machinery, livestock equipment, and building and fence costs. These costs are allocated to each livestock enterprise by the computer using a carefully devised formula to make the proper allocations.

Each enterprise table includes supplementary management information. This information can provide clues indicating the strengths and weaknesses of each enterprise.

Other factors are within earnings among farmers in a given year. Some of the causes for these differences in earnings, Each line represents 11 farm units. Every study of farm earnings shows a wide variation in his control. The most important management factors affecting earnings are as follows: such as weather, may be beyond the control of the individual farmer.

Returns from Livestock Crop Yield 1. 4.

Work Units Per Worker

Return over All Costs/Till. Acre Amount of Livestock 2.

Control Over Power & Machinery Expense

Gross Return Per Till Acre Size of Total Business 3.

## SETTING GOALS

One of the primary aims of the Farm Management Education Program is to assist farmers in reaching their farm and family goals. Clarifying their ideas as to what they really want is a very important step in improving the farm business and as result improving family living. Sitting down as an operator or husband and wife and putting these goals in writing is done in one of the early classes in the Farm Business Management Education Program.

Planning goals is not easy. All members of a family may not agree on what goals are most important. The family may have to give serious thought and discussion to the goals they choose so that all members of the family can benefit from the farming business. Not all goals are related to farm income. Some very important goals for a family may be in the area of social, community, family, church, and educational activities.

Setting up goals in a systematic way lets the family fit the wants and desires of all the family members into a plan. There are no right or wrong goals, since each family may approach the problems and opportunities they have in a different way. It is important that goals be reviewed frequently to see if conditions have changed. If the goals are inflexible, they may be a liability to progress rather than an asset.

Below is an example of the written goals of one family for the coming year. The following year these goals will be reviewed, evaluated, and probably changed or expanded to fit the ever changing needs and desires of the family.

FARM	FAMILY GOAL STATEMENT	This Year	<u>Later</u>
RANK	FOR A PROFITABLE FARM BUSINESS:		
6 1	-Buy a new tractor to replace old John Deere A -Raise the production of the dairy herd by 500	X	Х
8	lbs. of milk per cow -Raise the production of the dairy herd from 14000 lbs. to 18000 lbs. per cow in 8 years -Increase hay yield by 1 ton per acre in 3 years	X	Х
2	FOR SATISFYING LIVING:		
5 10	-Install kitchen cabinets -Build new family room on west side of house	Х	Х
11 12	-Paint exterior of home -Landscape yard	Х	х
	FOR DEVELOPMENT OF FAMILY MEMBERS:		
9	-Provide opportunity for son, Dave, to attend college in two years		X
7	-Provide money for Dad to attend the National Convention for a week this winter	X	
4	-Provide time and money for Dan to attend camp this summer	Х	
	FOR LONG-TERM FINANCIAL SECURITY:		
3	-Improve net worth by at least 5% per year	Х
