| INTRODUCTION 2000 | |
|------------------------------|--|

Farm Business Management education has been a part of agriculture education programs in Minnesota since 1952. From the early cooperative efforts of the State Department of Education and the Department of Agriculture Education (University of Minnesota), the program has expanded to serve over 6000 farm families each year in six farm management areas. Programs are now administered and managed by the Minnesota State Colleges and Universities through the Community and Technical Colleges located in 6 different regions in Minnesota.

The Farm Business Management Program is an educational program that is designed to help farm families achieve their farm business and family goals. This is done through improved management organization and efficiency of their farm operations. This purpose has not changed over the years.

To accomplish these purposes, programs have been organized to conform to the following guidelines:

1. Farm families enroll in a specific management course.
2. Each course has a specific objective and units of instruction to meet the objective.
3. Courses are offered in sequence and farmers are expected to enroll in the first of the sequence of courses.
4. There is continuity to each course. Each leads to the next course in the sequence.
5. Instruction occurs both in the classroom and on the farm with the farm family.

Programs organize their curriculum around the same central theme. They are:

- Level 1 - Introduction to Farm System Management
- Level 2 - Farm System Analysis and Evaluation
- Level 3 - Interpreting and Modifying Farm System Management Plans
- Level 4 - Farm System Trends and Projections
- Level 5 - Interpreting Current Information into Farm System Plans
- Level 6 - Examining the Context of Farm System Management Plans

The programs became course/credit based in FY92. Each individual enrollee completes a needs assessment with the instructor, after which the enrollee registers for classes and course work to meet these needs. A typical farm business enrollee registers for 10 semester credits per year. The purpose of this effort is to more adequately address the needs of the individual farmer, making enrollment even more beneficial.

Like most educational programs, members benefit from the instruction in relation to how much effort they put into study. Some farmers have benefited more, and some less, depending upon how seriously they studied the results of their business analysis and the kind of decisions they made as a result of their analysis.

The farm business and enterprise analysis format allocates all specific and general farm expenses to each farm enterprise. The allocation of all costs and the introduction of the new tables makes the analysis a useful report to be used for long range planning, short term cash purchase planning and cash flow projections. Special Recognition should be given to the farm families who have chosen to improve their management skills through participation in this program.
