Farm Financial Data Collection Task Force 1987 Report to the Minnesota Legislature

Field Report

FARM FINANCIAL DATA COLLECTION TASK FORCE

1987 REPORT TO THE MINNESOTA LEGISLATURE

FIELD REPORT

Field Report

In addition to an overall summary report for the benefit of the State Legislature, the MFFS gathered sufficient information to allow an analysis of farm operators by location, farm enterprise and farm size. The tables that follow summarize the farm operations in Agricultural Reporting Districts 10, 50 and 80 -- Northwest, Central and South Central regions of the state. Farm enterprises, as in the legislative report, are defined according to the proportion of total receipts contributed by the enterprises or combination of enterprises. Farm size is defined according to Total Cash Receipts and operators were divided into two groups -- less than \$150,000 total cash farm receipts and \$150,000 or greater.

This Field Report follows the same outline as the Legislative Report -- Cash Flow Situation, Debt-Asset Situation and Measures of Financial Performance -- by Region, by Farm Enterprise and by Farm Size. The intent is to be of assistance to farm operators, farm managers and instructors and credit advisors by providing summary income statements and balance sheets to be used for evaluation of one's own operation, teaching and advising.

FIELD REPORT

CASH FLOW SITUATION

The following Tables (Tables 1-4) summarize the "Cash Flow" situation of farm operators by Region for 1987. Table 1 is a Cash Flow Summary by Region compared to all farms and Tables 2-4 are Income Statements by Region, by Farm Enterprise, by Farm Size.

TABLE 1

REGIONAL CASH FLOW SUMMARY

| ITEM | <u>All Farms</u> (N = 978) | Northwest (N = 188) | <u>Central</u> (N = 244) | South Central (N = 219) |

Farm size is defined according to Total Gross Farm Receipts. The operators were divided into two groups: (a) less than \$150,000 and (b) \$150,000 or greater.

FIELD REPORT

MEASURES OF FINANCIAL PERFORMANCE

Tables 9-11, below, contain a selected set of statistics that provide a measure of the financial performance of farm operators by Region and by Farm Enterprise.

TABLE 9 MEASURES OF FINANCIAL PERFORMANCE BY FARM ENTERPRISE 1987

Agricultural Reporting District 10 (Northwest)

| a | (ARD 10) | Cash Grain (n=55) | Dairy-Swine (n=20) | Grain-Beef (n=25) | Grain-Dairy (n=29) | Grain-Sugar Beets (n=29) |

¹Definitions of Financial Measures are contained in Table 12, below.

TABLE 12

DEFINITION OF FINANCIAL MEASURES

| FINANCIAL MEASURE | DEFINITION OF FINANCIAL MEASURE |
|--|---|
| | e ability to make loan and debt payments as they come due during the year. |
| 1. Current Ratio | Current Assets divided by Current Liabilities. This ratio is used to measure the liquidity available for paying short-term obligations. It shows the ability to pay debts as they come due during the year. |
| 2. Current Debt Ratio | Current Liabilities divided by Total Liabilities. This measure reveals the debt structure of the farm operation between current and total liabilities. It shows the proportion of the total farm debt that must be repaid within the next year. |
| Debt Service Coverage Rational Farm Income, AloneTotal Cash IncomeTotal Cash Available | Net Cash Farm Income plus Interest Payments less Family Living and Income laxes divided by debt service costs (Interest plus Principal Payments). This ratio reveals the ability to service debt, meet family living needs and pay taxes out of annual farm income. A ratio less than "1.0" indicates a problem in meeting debt service requirements. Same as (a), above, except Off-Farm Income is included. Same as (b), above, except the Sale of Farm Assets is included as an additional source of income. |
| <u>Solvency Measures</u> Reflects th debt at a p | e risk of the farm's financial struc <mark>ture and ability to repay all out</mark> standing farm oint in time. |
| 4. Debt-Asset Ratio | Total Liabilities divided by Total Assets. This measure reflects the overall financial risk of the farm operator. It shows the amount of debt pledged against the assets of the farm. The larger the ratio, the greater the risk. |
| 5. Leverage Ratio | Total Debt divided by Net Worth or Equity. Commonly referred to as "Debt-Equity" ratio. Measures the amount of debt pledged against the farmer's equity. This measure reflects the overall financial risk of the farm to the farmer and the lender. The higher the ratio, the larger the creditor's share of farm assets, as do negative values. |

TABLE 12 (Continued)

DEFINITION OF FINANCIAL MEASURES

| FINANCIAL MEASURE | | DEFINITION OF FINANCIAL MEASURE |
|--|-------------------------------------|--|
| <u>Profitability Measures</u> Measures the farm's profitability and indirectly reflects the farmer's managerial ability. | | |
| 6. | Return on Equity (%) | Net Farm Income minus Family Living Expenses divided by Average Net Worth. Reflects the relationship between farm income and equity by measuring the returns to equity. |
| 7. | Return on Assets (%) | Net Farm Income plus Interest Payments minus Family Living divided by Average Total Assets. Measures the profitability in terms of the relationship to total assets employed on the farm including both debt and equity capital. |
| 8. | Profit Margin Ratio | Net Farm Income plus Interest Payments minus Family Living divided by Total Cash Farm Receipts. This is measure of the farm operator's ability to control the level of costs relative to revenues generated. |
| Efficiency Measures Measures the financial efficiency of the farm business. | | |
| 9. | Gross Expense Ratio | Total Expenses including Depreciation divided by Cash Farm Receipts. This ratio measures the extent to which the value of production exceeds the cost of production. The lower the ratio, the more efficient the farm operation. |
| 10. | Asset Turnover Ratio | Cash Farm Receipts divided by Average Total Assets. This is a measure of the ability to generate revenues from a given level of investment in assets. The higher the ratio, the greater the turnover of assets and, thus, a greater opportunity to earn profits. |
| 11. | Interest Expense - % of Receipts | Interest Expense divided by Total Cash Receipts. This ratio shows the proportion of cash receipts that are used for interest payments. |
