A Brief Overview of 2022

This report summarizes data from the Minnesota State Farm Business Management (FBM) Database to provide specialized information for Minnesota dairy producers.

Based on the graphic on the cover, over a 40-year farming career, each dairy farmer spends \$77,303,840. That graphic also shows that the farms in this report spent \$479,283,808 in their greater communities in 2022. The majority of the money is spent locally, including businesses and cooperatives, demonstrating the vital importance of farming on the economy of Minnesota.

The Federal Milk Order Class III milk price average for 2022 was \$21.96, up \$4.87 from 2021. However, while milk prices were higher, dairy producers also faced higher costs of production. Energy corrected milk was a strong driver behind profitability with the most profitable herds shipping over 2,000 pounds of fat and protein per cow. Overall, while the strong milk price in 2022 helped build profitability, it is important to be mindful of the potential challenges that lie ahead. Dairy producers may need to focus on maximizing milk components and managing their costs in order to maintain profitability in a more challenging market in 2023.

- The median dairy farm earned \$153,780, up from \$114,261 in 2021.
- The average price received for milk increased by 30% from \$18.58 in 2021 to \$24.24 in 2022.
- Total direct & overhead expenses were \$19.83 per hundred pounds of milk, up from \$17.19 in 2021.
- Dairy producers showed a profit of \$1.93 per hundred pounds of milk, or about \$491 per cow.
- The average dairy farm milked 274 cows, which is up from an average of 269 cows in 2021.
- The average milk production was 25,485 pounds, up from 25,049 pounds in 2021.

| Term Debt Coverage Trends | | | | | | | | |
|---------------------------|------|------|------|------|------|--|--|--|
| Year | 2018 | 2019 | 2020 | 2021 | 2022 | | | |
| Term Debt Coverage | 0.61 | 1.52 | 3.01 | 1.88 | 2.63 | | | |

This report is designed to provide an overview of both the whole farm financial picture for dairy operations, and provide insight into the dairy enterprise based on herd size.

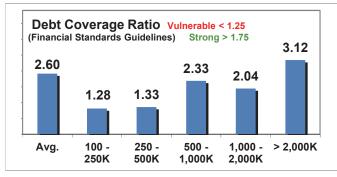

In cooperation with the Minnesota Department of Agriculture, we have estimated that the data in this report represents the following percentage of dairy herds in the state of Minnesota:

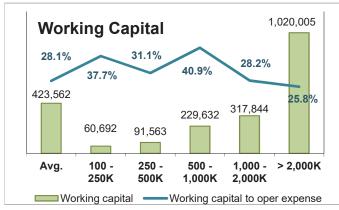

| Herd Size | Total Herds | < 50 Cows | 51-100 | 101-200 | 201-500 | >500 |
|-----------|-------------|-----------|--------|---------|---------|------|
| | 12.5% | ~4% | ~8% | ~23% | ~24% | ~27% |

Farm Business Management Education Programs **A Member of Minnesota State**

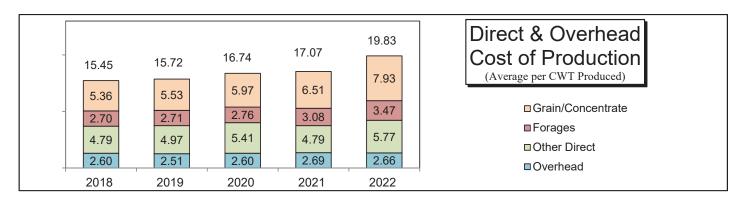

Additional Selected Sorts within the Dairy Enterprise

The State Database provides the opportunity to dig deeper into the data using special markers on farms with different practices. Using the FINPACK & RankEM Central software from the Center for Farm Financial Management, specific production practices can be included or excluded from a given sort. This enables selected practices to be compared. Below is a sample of the sort options which provide another comparative look at Minnesota's State Dairy Data.

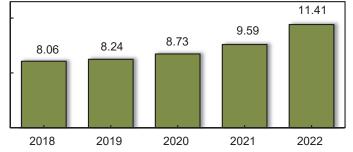

| Sort - Includes | All | Robotic Dairy | Non-Robotic Traditional | Non-Robotic 3X Milking | Organic | Dairy Initiatives |
