AGRICULTURAL MENTAL HEALTH & WELLNESS

The purpose of this program is to offer support to people who work in agriculture, providing ways to cope with and manage stress.

You matter. No concern is too small.

Experienced agricultural-focused mental health providers provide counseling services to farm individuals, couples, and/or families anywhere in the state – in person, via telephone, or Zoom,

Ted Matthews, M.S.

(320) 266-2390 | tdmatt@info-link.net | farmcounseling.org

Ted is a veteran and has worked with rural issues in counseling for over 45 years. He has been director of mental health services during two natural disasters in the 1990s. Ted also has extensive counseling experiences in the areas of crisis intervention, family issues, suicidology and domestic abuse.

Monica McConkey, MA, LPC

(218) 280-7785 | monicamariekm@yahoo.com | eyesonthehorizon.org Monica has worked in the mental health sector for the past 25 years. Her background includes work with youth and adults and covers a wide range of emotional challenges. Her recent work focuses on emotional stress of farmers and consulting with agriculture industry groups.

2023 Annual Report - Executive Summary

The 2023 farm year was the lowest net farm income in the past 4 years. Weather again played a major factor for many Northern Minnesota producers in production and profitability. Additionally, lower prices for most commodities and other crops were negative for many producers while another year of increasing input costs and overhead costs provided an increased challenge for operations to pursue profitable marketing strategies. The decreased cost of commodity crops at the end of the year did provide an advantage to many livestock producers when purchasing feeds and forages.

In 2023, Average Net Farm Income for the 581 farms in the Northern Minnesota database was \$82,849. This was down from the \$243,910 reported in 2022 and the lowest number since 2019. Median Net Farm Income was down as well, decreasing to \$40,629 in 2023, compared to \$135,642 in 2022.

| Financial Factors | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 |
|-------------------------|----------|----------|----------|----------|-----------|-----------|-----------|----------|
| Average Net Farm Income | \$59,480 | \$54,021 | \$59,306 | \$72,208 | \$156,941 | \$189,843 | \$243,910 | \$82,849 |
| Median Net Farm Income | \$25,654 | \$23,489 | \$25,857 | \$29,325 | \$85,468 | \$100,804 | \$135,642 | \$40,629 |

Most key financial measures showed decreases compared to 2022. Working Capital decreased in 2023 to \$317,100 at the end of 2023 compared to \$411,782 at the end of 2022; a decrease of 23.0%. Working Capital represents the dollar amount remaining after subtracting current liabilities from current assets. The 2023 Northern Minnesota term debt coverage average was 1.35 compared to 2.79 in 2022. 2023 brought lower prices for most producers, the Operating Expense Ratio came significantly higher in 2023 at 80.5% compared to 69.4% in 2022.

The Dairy industry showed some large decreases in net return per cow due to lower average milk price in 2023. However, they did have a lower cost of production compared to 2022. The Beef Cow Calf producers saw the highest net return per cow since 2015 with an average net return of \$98. The main reason for the positive net return was the average price received for the sale of calves, especially the second half of 2023.

| Statewide FBM Data | Dairy (Excludin | ng Organic & Orga | nic Transition) | Beef Cow-Calf (Excluding backgrounding) | | | |
|----------------------------------|-----------------|-------------------|-----------------|---|----------|----------|--|
| Statewide FBIVI Data | 2021 | 2022 | 2023 | 2021 | 2022 | 2023 | |

| Net Return / Cow | \$208 | \$686 | \$37 | (\$166) | (\$236) | \$98 | |
| Average Milk Price | \$18.41 | \$24.24 | \$19.14 | xxx | xxx | xxx | |
| Cost of Prod per CWT w/LaborMgmt | \$18.23 | \$22.23 | \$19.71 | xxx | xxx | xxx | |
| Average Price per CWT Calf Sold | xxx | xxx | xxx | \$153.79 | \$180.23 | \$223.17 | |

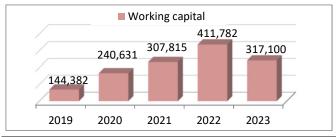

2023 showed a decrease in yields for the northern half of Minnesota for corn and soybeans, while spring wheat saw the highest yield since 2017. The three major commodity crops had average yields per acre of 159.3 bushels for corn, 39.4 bushels for soybeans, and 67.4 bushels for spring wheat. Net returns were positive on all three crops for the fifth consecutive year. The chart below displays the 3-year history of selected factors for these crops.

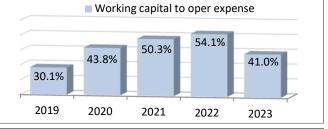

| | | | | Gross | Dir & Ovhd | | Dir & Ovhd |

Selected Factors by Type of Farm

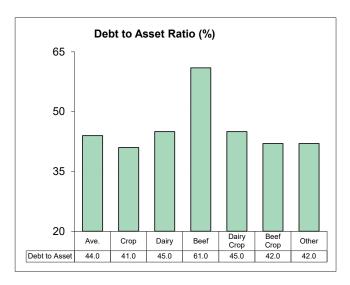

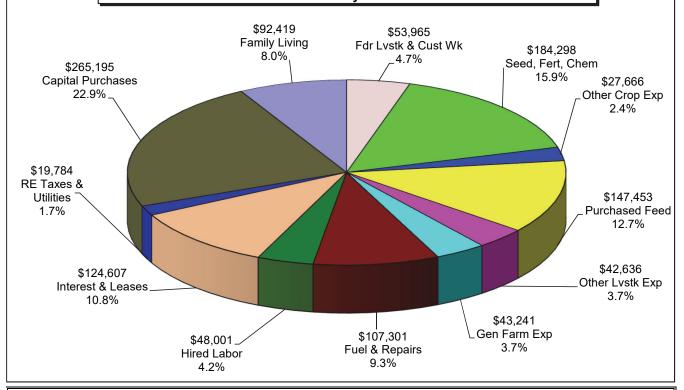

Each farmer, on average, spent \$1,156,566 in the Greater Community in 2023

Average Money Spent by Each Farmer in the Greater Community: \$1,156,566

Average Money Spent by Each Farmer in a 40 Yr Career: \$46,262,640 Money Spent in Community by 581 Farmers: \$671,964,846

Report Overview

Farm Business Management Education has been a part of agricultural education programs in Minnesota since 1953. FBM Programs are now an integral part of the Minnesota State System, delivered through seven two-year colleges. The 2023 Northern Minnesota Annual Report includes data from Farm Business Mangement programs administered by: Northland Community & Technical College, Central Lakes College, Alexandria Technical & Community College, and St. Cloud Technical & Community Colleges.

This report was prepared under the direction of Ron Dvergsten, Josh Tjosaas, Nate Converse, and DelRay Lecy through AgCentric, the Northern Center of Excellence for Agriculture. A special thank you goes to Keith Olander, AgCentric Executive Director, for his leadership.

Report tables were created using FINPACK and RankEm Central, copyrighted software of the Center for Farm Financial Management, University of Minnesota. The Center also shared the Financial Scorecard on the back cover.

The financial portion of the report, found in the first 27 pages, uses a standard format for each table. Data from the analysis system is printed in a four column format, which includes: Average, Low, Middle, & High. The High, Middle, & Low ranges are calculated based on a 20% slice of the farms in the total group.

The enterprise tables begin on page 30. Each of these tables consist of: a size indicator, a total & per unit income, direct & overhead expenses, and other information. Costs which are considered operating, whether easily assigned or are allocated, are listed as Direct Expenses. Costs which are general in nature, whether fixed or variable, are listed as Overhead Expenses.

The criteria for determining the 20% categories in each area are listed below:

Analysis Section
Financial
Crops
Statewide Livestock

Criteria to determine the "20%" categories

Net Farm Income

Recommended Farm Financial Ratios

Explanations of the FFSC recommended measures on the scorecard and where to find the information for each measure

Measures from the Balance Sheet

The balance sheet provides information on both a business's both **liquidity** and **solvency** positions. **Liquidity** is the ability of the farm business to meet financial obligations as they came due, or to generate enough cash to pay for family living expenses, taxes, and to make on-time debt payments. **Solvency** is the ability of the farm business to meet all of it's debts if it were sold at the current point in time.

Recommended Liquidity Ratios

Current Ratio

Measures the extent to which current farm assets, if sold tomorrow, would pay off the farm's current liabilities.

• Working Capital as % of Gross Revenue

Measures the operating capital available against the size of the business.

Working Capital as % of Operating Expense*

Measures the operating capital available against the amount of the business's operating expenses.

Recommended Solvency Ratios

• <u>Debt-to-Asset Ratio</u>

Is the bank's share of the farm business. Compares total <u>farm</u> debt to total <u>farm</u> assets. A higher ratio indicates greater financial risk & lower borrowing capacity.

• Equity-to-Asset Ratio*

Is the farmer's share of the business. Compares total <u>farm</u> equity to total <u>farm</u> assets. *Debt-to-Asset* ratio + *Equity-to-Asset* ratio must = 100%.

Debt-to-Equity Ratio*

Compares the creditor's investment to the farm owner's investment. It also indicates how much the farmer has leveraged their equity in the business.

Measures from the Income Statement

The *income statement* is a financial statement which provides information regarding the **profitability** of the farm business. **Profitability** is the difference between the value of goods produced and the cost of the resources used in their production.

Recommended Profitability Measures

• Rate of Return on Assets

Can be thought of as the average interest rate being earned on all (yours and the creditor's) investments in the farm.

• Rate of Return on Equity

Represents the interest rate being earned by your investment in the farm. This interest rate or return can be compared to returns available if your equity were invested elsewhere, such as a Certificate of Deposit or the stock market.

Operating Profit Margin Ratio

Shows the operating efficiency of the farm business. If expenses are low relative to the value of farm production, or revenue, the business will have a healthy operating profit margin. A low profit margin ratio can be caused by low product prices, high operating expenses, or inefficient production.

Asset Turnover Ratio

Measures efficiency in using capital. You could think of it as a measure of capital productivity. Generating a high level of production with a low level of capital investment will show as a high asset turnover rate. If, on the other hand, the turnover is low you will want to explore methods to use the capital invested more efficiently or sell some low-return investments. It could mean getting rid of that swampy parcel on the back 40 and getting something that produces income.

* Denotes Acceptable Alternate Measures of the FFSC (https://ffsc.org/)

Recommended Farm Financial Ratios (cont.)

Explanations of the FFSC recommended measures on the scorecard and where to find the information for each measure

Measures from the Cash-Flow Statement

The *cash-flow statement* provides information on a business's **repayment capacity**. **Repayment capacity** shows the borrower's (i.e. your) ability to repay debts on time. It includes non-farm income and as such is **not** a measure of business performance alone.

Recommended Repayment Capacity

• <u>Debt Coverage Ratio</u>

Indicates whether your business generated enough income to cover current interest expense and all intermediate and long-term debt payments.

• Replacement Coverage Ratio

A ratio of less than 1.0 indicates that you did not generate enough income to cover debt payments and unfunded capital purchases.

• Term Debt & Finance Lease Coverage Ratio*

Indicates whether your business generated enough income to cover all intermediate and long-term debt payments. A ratio of less than 1.0 indicates the business had to liquidate inventories, run up open accounts, borrow additional funds, or sell assets to make scheduled payments.

Measures from all the Financial Statements

Using all the financial statements can provide valuable insight into the **financial efficiency** of a farm business. These measures show where each dollar of income generated is spent.

Recommended Financial Efficiency

• Operating Expense Ratio

Shows the proportion of farm income that is used to pay operating expenses, excluding depreciation and interest expense.

• Interest Expense Ratio

Shows how much of gross farm income is used to pay for interest on borrowed capital.

• Depreciation & Amortization Expense Ratio

Indicates how fast the business wears out capital. It tells what proportion of gross farm income is needed to maintain the capital used by the business. It is important to note that a depreciation expense ratio of less than 3% **could** indicate the operation is not replacing inefficient assets and may have higher repair expenses.

• Net Farm Income (Income from Operations) Ratio

Compares profit to gross revenue. It shows how much is left after all farm expenses, except for unpaid labor and management, are paid.

* Denotes Acceptable Alternate Measures of the FFSC (https://ffsc.org/)

Other Important Farm Financial Measures

Other important measures (and their calculations) that are utilized in the scorecard

Working Capital

Measures the operating capital available in the shortterm from within the business.

Total Current Farm Assets

- (-) Total Current Farm Liabilities
- = Working Capital

Net Farm Income (NFI)

Represents the return to three things that you have invested in the farm business:

- 1) Your labor
- 2) Your management, and
- 3) Your equity.

NFI is the reward for investing your unpaid family labor, management, and money in the farm instead of elsewhere. Anything left in the business and not taken out to pay for family living expenses or taxes, will increase the net worth of the farm.

Gross Accrual Farm Revenue

- (-) Total Accrual Operating Expense (including Depreciation & Amortization Expense)
- = Income from Operations
- (-) Farm Interest Expense
- = Net Farm Income

Value of Farm Production (VFP)

VFP is a measure of the value a farm operation has added to products sold.

Gross Cash Farm Revenue

- (-) Feeder Livestock Purchased
- (-) Purchased Feed
- (+/-) Changes in Inventories
- = Value of Farm Production

Repayment and Replacement Capacity Calculations

Income from Operations

- (+/-) Miscellaneous Revenue / Expenses
- (+) Non-farm Income
- (+) Depreciation / Amortization Expenses
- (-) Income Tax Expense
- (-) Owner Withdrawals
- = Repayment and Replacement Capacity

Repayment and Replacement Capacity (-) *Interest Expense on Current Debt*

= Term Debt Repayment & Replacement Capacity

Prior Year Current Portion of Long-Term Debt (+) Prior Year Current Portion of Finance Leases

- (+) Interest Expense on Term Debt
- (+) Interest Expense on Finance Leases
- = Total Principal & Interest on Term Debt and Finance Leases

- (+) Payment on Unpaid Operating Debt from Prior Period (loss carryover)
- (+) Annual Payments on Personal Liabilities
- = Total Debt Repayment

Repayment & Replacement Capacity (-) Total Debt Repayment

= Repayment Margin

= Replacement Margin

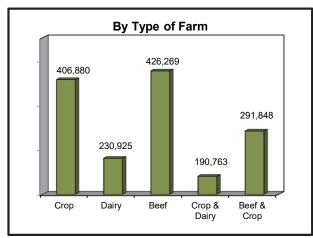

- 1 = Measures the amount generated from farm and non-farm sources, to cover debt repayment and capital replacement.
- 2 = Portion of depreciable capital asset purchases not funded by term debt and finance leases. This measure is the amount of internally generated funds used for investing activities related to depreciable capital assets.

How does your Farm Stack Up?

Northern Minnesota Farm Business Management Data

Below is a summary of the low, average, and high farms using the Financial Standards Measures. The numbers listed below are intended to provide a general overview of the farm situation for the current year and over a five year period. The current year data provides a snapshot of the conditions that represent the present while the five year data provides a longer term look at these factors to enable their use in potential decision making activities.

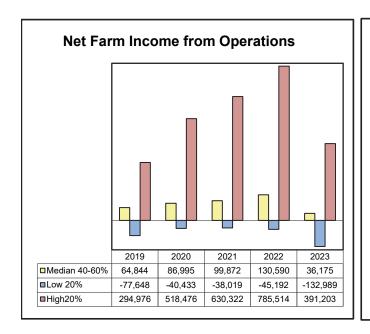

For additional information, please see the back cover of this report. A "Financial Scorecard" is provided in color for your use.

Individual Enterprise Analysis Tables

The individual crop and livestock tables are designed to identify the costs and returns for specific enterprises on the farm. Data from all farmers with each enterprise is merged. The minimum number of farms, in order to print a given column on the following reports, is five (5). This enables the necessary level of confidentiality for publication of this information.

<u>Crop</u> report costs such as fertilizer, chemicals, seed, crop drying expenses, hired labor, and custom hire are costs that are assigned to each individual crop. These costs are shown in the crop enterprise analysis as *Direct Costs*.

Other costs, called *Overhead Costs*, are divided out by formula. Overhead costs are assigned by an allocation factor to each enterprise. The allocation factor is based on historical data of labor and capital intensity.

There are a couple of subtle differences between the Owned Land and Cash Rented Land tables. Naturally, on cash rented land, the actual cost of renting the land is reported in the direct cost section. On the owned land, there are two different lines of information in the overhead cost section that would be included for calculating cost of ownership: real-estate taxes and interest on long-term debt.

The <u>livestock</u> reports have a format similar to the crop reports. Production information is listed at the top of each table. This will include animal or product sales, purchases, sales, transfers, and inventory change.

The *Direct Costs* include costs that are assigned to the enterprise, including items such as: feed, veterinary, breeding, marketing, hired labor, fuel & repairs, and livestock supplies. The *Overhead Costs* include formula-assigned costs, including items such as: depreciation, interest, utilities, and insurances.

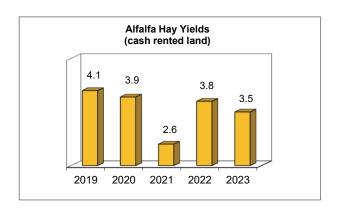

At the bottom of each livestock report, there is a list of selected factors for each enterprise. These factors are a combination of production indicators and efficiency indicators.

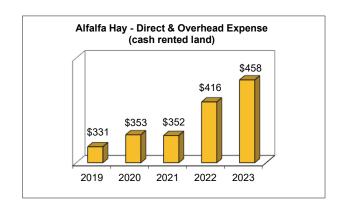

Towards the bottom of both the <u>crop and livestock</u> enterprise tables, are four (4) factors that show varying levels of Cost of Production. Those factors include a cost of production based on: direct costs, overhead & direct costs, total cost less government payments and/or other revenue, and total cost including labor & management.

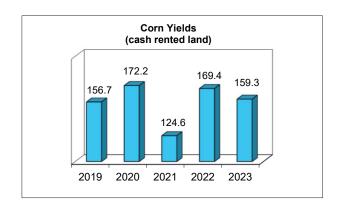

<u>Machinery Cost per Acre</u> is a factor used to combine all costs related to machinery usage. The Machinery Cost per Acre includes: Fuel & Oil, Repairs, Custom hire, Machinery leases, Interest on machinery debt, and Machinery depreciation. A machinery cost summary for five prominent Northern Minnesota crops is listed below. Data is taken from the owned land enterprise tables.

| Crop | 2019 | 2020 | 2021 | 2022 | 2023 |
|--------------|----------|----------|----------|----------|----------|
| Alfalfa Hay | \$161.73 | \$168.16 | \$182.89 | \$207.03 | \$211.62 |
| Corn | \$160.80 | \$166.17 | \$165.39 | \$197.33 | \$197.08 |

FARM MANAGEMENT

Learn how to grow a strong, sustainable farming business.

The Farm Business Management degree at SCTCC is designed to educate farm owners/operators and those about to go into the farming industry to meet and exceed both personal and business goals. Faculty work on your farm with individualized curriculum for the needs of each farm owner. Instruction is based on economic, social, and cultural goals of the family and business unit.

A member of Minnesota State

FARM MANAGEMENT CERTIFICATE OPTIONS:

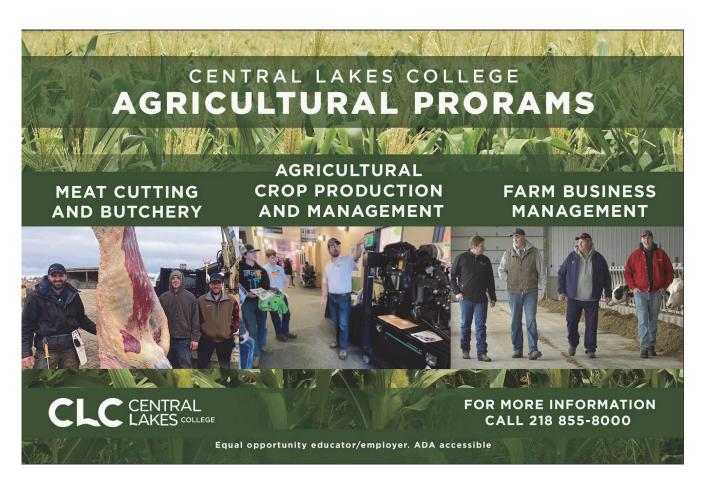

- Essentials of Farm Business Management
- Applications in Farm Business Management
- Advanced Farm Business Management
- Current Issues in Farm Business Management
- Agricultural Commodities Marketing

2023 FARM BUSINESS MANAGEMENT FINANCIAL ANALYSIS BY COUNTY

MINNESOTA FARM BUSINESS MANAGEMENT EDUCATION PROGRAMS

Vision:

To provide educational opportunities for students to be successful in a competitive agricultural environment.

Mission:

To deliver management education for decisionmaking that achieves an individual's business goals.

Guiding Principles:

- 1. Improved Quality of Life in Communities
- 2. Achievement of Student Goals
- 3. Awareness of the Global Importance of Agriculture
- 4. Integrity in Student Interaction
- 5. Timely and Student-Focused Programming

SOURCES OF DATA

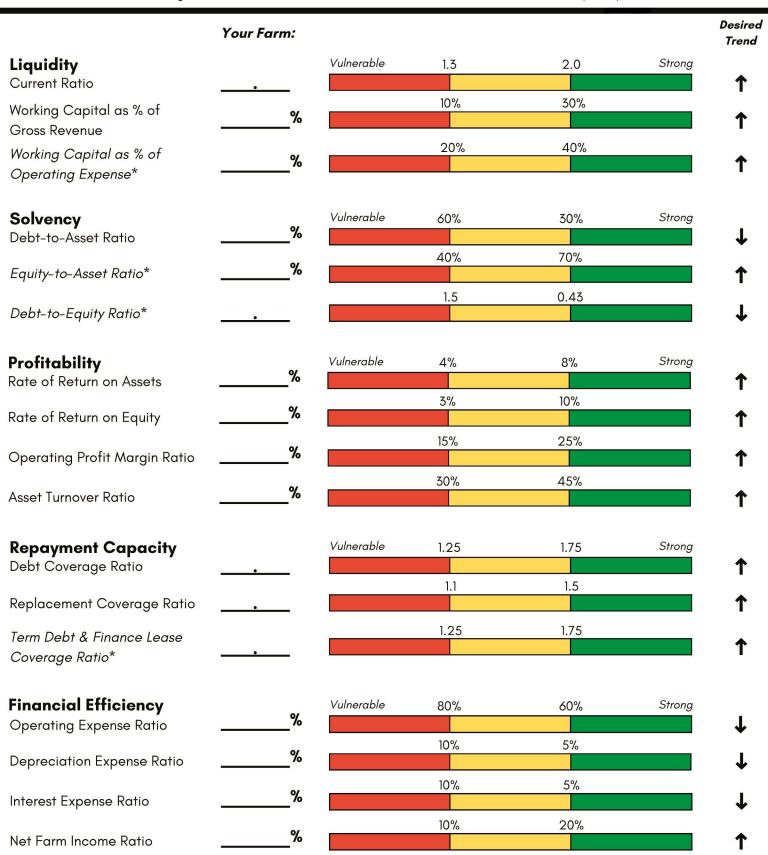

The 2,317 producers who provided data for three MN regional reports are located in 83 of Minnesota's 87 counties. Those counties are highlighted on the map to the left, color coded based on the number of farms included from each county.

Farm Financial Scorecard

Using Recommended Measures from the Farm Financial Standards Council (FFSC)

^{*} Denotes Acceptable Alternate Measures of the FFSC (https://ffsc.org/)
